

ARROWS AND TAPE PRODUCTS

PROMOTING EXCELLENCE IN THE ELECTRONICS INDUSTRY

KAPTON TAPE

High heat resistance, excellent dielectric strength, and removes cleanly without leaving a residue.

LOW STATIC KAPTON TAPE

Ideal for use in circuit board production and can be used in wave soldering, solder dip, or electrical applications where static is an issue.

KAPTON DISCS

High heat and puncture resistant, ideal for use to protect areas on circuit boards during wave soldering or electronic production.

KAPTON FILM

Argon's 1mil film, 2mil film, and 5mil film are ideal for use in coil insulation.

DB 100 BLUE POLYESTER PLATING TAPE

Blue .001" polyester film tape with pressure sensitive .002" silicone adhesive withstands temperatures up to 400 degrees F

COPPER FOIL TAPE

Argon's copper foil tape is ideal for grounding flooring or building ground systems. This copper foil tape has an electrically conductive pressure sensitive adhesive system.

SOLDERWAVE DISCS

Ideal for use in solder wave masking, and high temperature paint operations and removes cleanly leaving no residue.

MARKING DISCS

Argon's colorful marking discs are ideal for marking areas for identification purposes.

INSPECTION ARROWS

Our inspection arrows remove without leaving adhesive residue. They will not curl, dry out or fall off. Available in rolls or envelopes of 1,000 or 5,000 pcs.

TAPE DISPENSER

Argon's tape dispenser is a cut above the rest. The dispenser is ideal for jobs requiring various cuts of tape.
